

Six Ways to Read

- 1. Getting help from pictures. A picture can help to tell you what the words say.*
- 2. Remembering. You remember some words because you see them over and over.*
- 3. Sounding out the letters. The sounds of the letters in a word can help you to read it.*
- 4. Expecting what comes next. Expecting words to come along makes you ready to read them.*
- 5. Writing. Writing words is good practice for reading them.*
- 6. Making sense. If what you read makes sense to you, you're probably reading it right.*
